COORDINATE PA IS THE NEXT GENERATION OF UTILITY COORDINATION

Coordinate PA is a web application developed by Pennsylvania One Call System to support public works, utility project planning and utility coordination within the Commonwealth of Pennsylvania. Users utilize a spatial, map-based system to view underground utility and public works projects, identifying opportunities for coordination and collaboration when projects overlap in space and time.

Coordinate PA Benefits:

- Define projects using a web application (No special software required!) Store project data and records in a secure repository
- Gather and disseminate information to a broader range of stakeholders beyond project planners and public works officials
- Coordinate and collaborate on projects outside your scope of responsibility, saving money and improving service for all parties
- Request meetings and upload documents associated with a complex project

Dedication That Goes Beyond The Curb

At WM, we care about the communities we call home. And we know that nothing is more important to the future of these communities than a healthy environment. That's why we're always working for a sustainable tomorrow.
